

Blindsight: a room-sized, four-channel video sculpture-installation

This floor plan documents installation in a 12' high, 28' x 25' space. Internal dimensions are 10' x 20' x 23'. Ideally, additional open space would be available outside of the installation, making total space 40' x 50' or more, with a 12' ceiling. However, the installation can be designed to fit any venue.

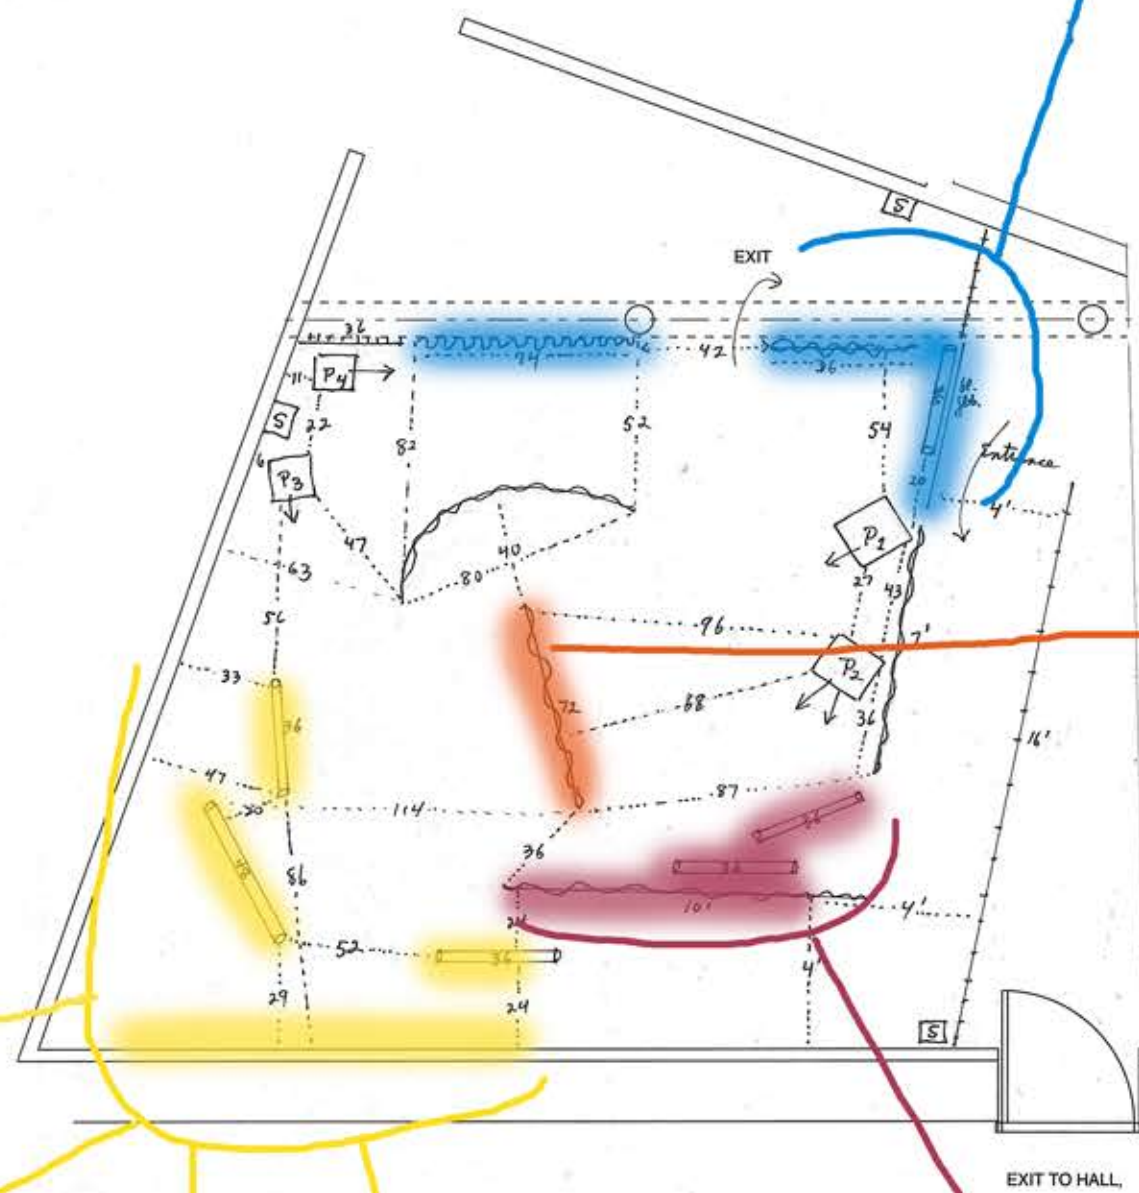

Four synchronized projections onto 12 suspended surfaces.

- Surface materials:
- 5 whole rawhide cowskins
 - 3 vellum paper scrolls
 - 1 black metal scroll
 - 1 bolted roll of moiré fabric
 - 2 curtained rolls of gauze fabric
 - 1 black felt curtain
 - 1 wall of room

Most surfaces are transparent, creating multiple and differing views from the reflected side and the transmitted side, and allowing the image to spill through onto new surfaces.

Measurements are in inches.

P1, P2, P3, P4 = Projectors

Structure four: four surfaces

- One rawhide cowskins
- one black felt curtain
- one black metal scroll
- one gauze fabric curtain

Structure three: one rawhide cowskin

Structure One: 4 surfaces

- two vellum paper scrolls
- one moiré fabric scroll
- wall behind these three

Structure Two: 3 surfaces

- One rawhide cowskin
- Two vellum paper scrolls
